Full Circle Care

**Start with medical or non-medical care: we qualify you for every service**

## Intake Nurse Call

We are so happy to help you! Cooperative 360 is an easy and efficient process. When you are ready, our 10-minute Intake Nurse Call empowers you to understand and to qualify for every type of home care service. Most people need a combination of medical and non-medical help, and we provide both.

## Medical Home Health Care

Home Health Care is funded by both traditional Medicare and Managed Medicare. If you qualify for Home Health, our nurses and therapists (PT, OT, Speech) help you at your home as prescribed by your doctor. Home Health is short-term nursing and therapies to restore independence after a decline.

## The GUIDE

Traditional Medicare recipients (not Managed Medicare, such as UHC or Aetna) may qualify for Medicare's GUIDE program for older adults with signs of dementia. The GUIDE pays for 75 hours of home care per year, in 4-hour increments.

## Non-Medical Personal Care

For those who qualify, MoHealthNet (Medicaid) Personal Care includes basic and advanced personal care by trained caregivers, as well as Consumer Directed Services provided by family members and/or friends. Nurse visits may also be included.

## VA & Private Services

Private Services are funded through VA, self-pay and/or long-term care insurance. Caregivers provide non-medical help with baths/showers, dressing, meal prep, general supervision and more. Cooperative offers shorter shifts than other home care companies, so you are not paying for more than you need.

## Our Cooperative 360 Process:

**Call 314-772-8585** →

- *We empower you to understand and qualify for every type of home care service*
- *Most patients need medical and non-medical care*
